

super^{ink} REFILL SET (4/6 colors)

REFILL ACCESSORIES KIT - INSTRUCTIONS

The "Refill Set" is a basic accessory kit to be used for all inkjet cartridges refilling operations.

This product is available in **4/5-colors packages** (black, cyan, magenta, yellow) and **6-colors packages** (black, cyan, magenta, yellow, light cyan, light magenta) and can be used with all inkjet printers (Brother, Canon, Dell, Epson, HP, Lexmark, Ricoh, etc.).

Package Contents

RECOMMENDATIONS

- Always follow "Refill Instructions". Please do not refill cartridges that have been exhausted for a long time or are completely empty; best results are obtained by refilling cartridges before they are completely empty.
- Prepare a working space to avoid unwanted spills.
- Always wear protective gloves.
- Always use the same needle for the same color.
- Pay attention to the color arrangement in the cartridge (injecting ink of the wrong color in the wrong hole will make the cartridge unusable).
If you are not sure about the color arrangement in a cartridge, please use a cotton bud or a toothpick to identify the color.
- Once the refill procedure is complete, clean needles thoroughly with warm water and store inks and accessories in a safe place; keep out of the reach of children.
- After using the product, always perform one or more cleaning cycles to restore the right ink flow in the printer.
- **WARNING: Syringes and needles contained in the package are NOT medical devices. Do NOT use on people or animals!**

Accessories

10ml Color Syringes

- Always use the same syringe for the same color.
- After use clean needles and syringes thoroughly with warm water and store them in a safe place; keep out of the reach of children and pets.
- Products surrounded by a **broken line** are available only in 6-colors packages.

Blunt Tip Needles & Caps

Silicone Plugs

"A" Type

"B" Type

- A silicon plug of the same color as the ink makes recognition easier and helps avoiding mistakes.
- Use the plug type fitting your cartridge; diameter is 4mm.
- Products surrounded by a **broken line** are available only in 5/6-colors packages.

Protective gloves

4/6
pairs
of gloves

- Always wear protective gloves while refilling cartridges.
- Gloves can be reused several times; if necessary clean gloves with warm water and put them away only after they are thoroughly dry.
- from 4 to 6 pairs of gloves are included in the packaging (depending on the type of kit purchased).

Manual Mini-Drills

Mini-Drill 3.6mm

- 3.6mm hand-drill for inkjet cartridges.
- Ideal for opening simple refill holes. With the plugs included in the kit (in this case you have to widen the hole up to 4mm) this tool makes following refills faster and cleaner.

Mini-Drill 2mm

- 2mm hand-drill for inkjet cartridges.
- Ideal for opening simple refill holes. This tool makes following refills faster and cleaner.
